

For the Health & Welfare of our children

Choose Toys & Games care-fully

Why does it matter?

Children learn about the world through play.
Violent play decreases the ability to learn empathy.
Violence desensitizes us to violence.

What should I look for?

Toys and Games that promote

Creative

Active

Constructive

& Cooperative play

Remember:

No toy can substitute for even a few minutes of warm, loving & supportive interaction with a child.

What you model is more important than what you buy. Make it your practice to listen, love, honor and negotiate with your children.

You can check violence ratings for games at www.esrb.org.
